

IBM BladeCenter® Systems smart blade choice, more blade options

IBM BladeCenter solutions from Jeskell offer a comprehensive portfolio of chassis, interoperable blade servers, switches, and I/O fabrics, all managed from a common infrastructure to meet diverse application, environmental, and performance requirements. Innovative, open architecture supports industry standards and offers a true alternative to sprawling racks and overheated server rooms.

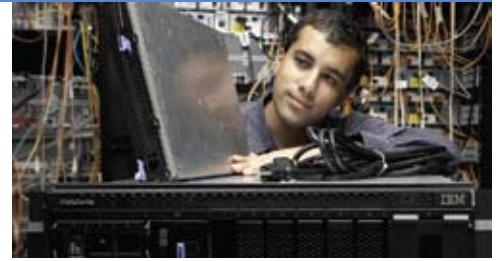

As IT demands continue to grow, companies face increasingly difficult challenges: server sprawl, growing infrastructure complexity, and pressure to slash energy use. IBM BladeCenter solutions from Jeskell help meet these challenges. They offer a family of modular chassis with a common management platform that enables mix and match sharing of components, like blades, switches, and management software.

- Choice of Intel® Xeon®, AMD Opteron, IBM PowerPC®, and Cell Broadband Engine™ processor-based blades
- Applications range from consolidation, collaboration, and commerce to high performance computing, ERP/CRM, and next-generation networks
- Support for IBM i™, Microsoft® Windows Server®, Red Hat Enterprise Linux, SUSE Linux Enterprise Server, VMware Infrastructure, and Solaris operating systems
- Power savings up to 35% compared to rack and tower-based solutions

- Consolidation of Linux®, UNIX®, IBM i, Microsoft® Windows®, and Solaris workloads into a single chassis
- Industry leading virtualization — VMware, Microsoft, Red Hat, and Novell
- Single point of management for both physical and virtual systems
- Automatic monitoring and real time adjustment of processing power to match varying workloads
- BladeCenter IBM SystemStorage® options support multiple technologies, like Fibre Channel, iSCSI, and SAS
- Wide range of flexible financing options for lease or purchase

Jeskell: BladeCenter experience you can count on

Jeskell, with BladeCenter experience across organizations of all sizes, can help you design and implement flexible, cost-effective, end-to-end BladeCenter solutions to meet most business requirements.

- One-stop source for fully integrated BladeCenter solutions — certified to provide all IBM server platforms, storage systems, software, and services
- Top-tier IBM BladeCenter business partner — highly competitive pricing
- In-depth expertise for all relevant BladeCenter technologies and products
- Services range from initial planning and hardware/software selection to integration, deployment, and knowledge transfer
- Nationwide network of IBM certified sales and technical specialists
- Full support for migration from competitive rack mount systems
- \$1.5M in-house Solution Center — includes hardware/software/storage for BladeCenter evaluation, POC's, application testing, and training
- Established relationships with the broadest ecosystem of application providers in the blade environment

Services you can trust

As a top-tier IBM Premier Business Partner, Jeskell has ready access to the vast array of IBM technical and support services. We also offer a full complement of our own technical and professional services to help you plan, architect, and implement your BladeCenter solution.

Track record of success

Established in 1991, Jeskell has experienced continuous growth by helping commercial enterprises, government agencies, and educational institutions nationwide successfully deploy the right technology solution for their specific IT infrastructure and business needs.

Headquartered in Silicon Valley, Jeskell has offices across the US and is regularly in the top five percent of all IBM business partners. At Jeskell, we measure our success by yours. Contact us today.
