

IBM System x® Servers x86 building blocks for the dynamic infrastructure

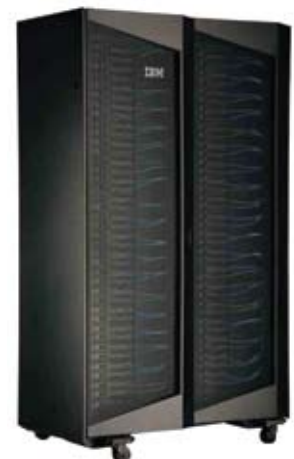

The IBM System x and BladeCenter® portfolio of open-standards-based x86 systems from Jeskell includes blade, tower, rack-mount, and cluster servers designed to be the foundation for your business-critical applications — from commerce, collaboration, and distributed databases to compute-intensive data centers, high performance scientific computing, and cloud implementations.

Building a dynamic infrastructure demands continual focus on infrastructure efficiency and cost reduction; improving services and business responsiveness; and effectively managing risk to ensure security, scalability, and availability.

IBM System x and BladeCenter servers and storage, virtualization tools, networking tools, and applications from Jeskell help you meet this demand. Based on IBM fourth generation X-Architecture® and advanced Intel® Xeon® and AMD Opteron processors, IBM System x solutions from Jeskell can:

- Reduce power costs by up to one half compared to previous generation servers
- Achieve up to twice the performance of their predecessors
- Automatically adjust processing power and scale energy use to the workload
- Increase hardware utilization and decrease the number of physical assets you need to manage

- Enable consolidation and simplification of heterogeneous workloads on a single platform
- Support a broad choice of virtualization solutions — VMware, Microsoft®, Red Hat, and Novell
- Work with a wide range of operating systems — Microsoft® Windows Server®, Red Hat Enterprise Linux, SUSE Linux Enterprise Server, VMware Infrastructure, and Solaris
- Significantly reduce total cost of ownership with easy-to-use IBM management tools
- Provide a single, secure interface to manage physical and virtual systems from almost anywhere

Jeskell: System x experience you can count on

Jeskell has nearly two decades of successful experience with IBM x-86 technology. We deliver the full line of System x servers, related storage systems, software, and services and can integrate them into flexible, cost-effective, end-to-end infrastructure solutions that can be scaled quickly and easily.

- One-stop source for fully integrated solutions — certified for all IBM server platforms, storage systems, software, and services
- Top-tier IBM System x Business Partner — highly competitive pricing
- Certified expertise for IBM X-Architecture from a nationwide network of IBM certified sales and technical specialists
- Total solutions, from initial planning to final deployment, knowledge transfer, and ongoing support
- Migration support that minimizes business disruption
- \$1.5M in-house solution center includes hardware, software, and storage for System x evaluation, POC's, application testing, and training
- Large number of favorable financing options for lease or purchase
- Established relationships with key third-party technology and solution providers

Services you can trust

As a top-tier IBM Premier Business Partner, Jeskell has ready access to the vast array of IBM technical and support services. We also offer a full complement of technical and professional services to help you plan, architect, and implement your System x solution.

Track record of success

Established in 1991, Jeskell has experienced continuous growth by helping commercial enterprises, government agencies, and educational institutions nationwide successfully deploy the right technology solution for their specific IT infrastructure and business needs.

Headquartered in Silicon Valley, Jeskell has offices across the US and is regularly in the top five percent of all IBM business partners. At Jeskell, we measure our success by yours. Contact us today.
